

BFIC GOLD

Crypto for everyone
and everything!

BFIC Gold token is a product of Innovation Factory, a tech firm dedicated towards developing modern day solutions based on blockchain technology for enhancing the worldwide adoptability of blockchain and crypto.

Innovation Factory was established in 2019 with the core motive of aiding worldwide crypto adaptability. For 3 years, the firm was devoted into developing an entire ecosystem of utility & rewardable programs that helped the company generate a generous community of 20M users.

With the establishment of Blockchain Foundation for Innovation and Collaboration (BFIC), its dedicated blockchain and BFIC coin (native token), the visionary firm now aims at generating a community of 200 million users to take its ecosystem of utilities global, and enable the masses in benefiting from the technology.

As BFIC coin has a very limited supply, its requirement to generate a larger community required a supporting asset, hence BFIC Gold has been designed to help achieve the goals and aid BFIC's growth.

With thousands of cryptocurrencies already floating in the market, everyday users are still unable to benefit from them in any practically usable way. At most, retail users can only trade them, while institutional giants are enjoying all the gains and utilities.

B-Gold is designed to fill in this gap and to make crypto and blockchain more usable for the everyday users. Apart from the mainstream trading and staking, B-Gold will act as an ultimate gateway to BFIC's scalable, secure and borderless utilities ranging from entertainment to health, education to gaming and much more.

CRYPTO
FOR **EVERYONE**
AND **EVERYTHING.**

As BFIC Gold has the slogan of “**crypto for everyone and everything**”, the primary goal of the project is to make BGOLD a globally accepted cryptocurrency with **10,000 collaborations** and an acceptance at over **1 Million platforms** in **5 years**.

With the goal of turning the existing 20 million community into an enormous 200 million strength, BFIC Gold will act as a key player in acting as a gateway to rewardable programs, community engagement initiatives and utilities that will not only derive benefits to the community but will also create a inter-linked community growth ecosystem. BFIC Gold’s community will help the utilities and BFIC coin, and vice versa.

The planned collaborations for BFIC Gold include **crypto wallets, exchanges, DAOs, dApps, Web3 startups, blockchain foundations, AI projects, AR/VR** and **Metaverse** initiatives and many more.

Accordingly, BFIC Gold will list on 10 crypto exchanges at the time of launch, and will expand the listing horizon on monthly basis making it one of the most widely available cryptocurrencies across the markets. The broader it spreads, the more users will have access to it, hence generating a magnificent community around the world.

B-Gold is deployed on the **BFIC blockchain**. Blockchain Foundation for Innovation & Collaboration (BFIC) is a proof-of-authority blockchain with BFIC coin as its native coin. The BFIC blockchain is host to an extensive ecosystem of utilities that are designed to facilitate users with potentials utilities that enhance the daily lifestyle with safer, faster and diversified applications.

BFIC will soon rollout its first of a kind **proof-of-contribution consensus network** that will reward validators, smart contract developers and users with incentives based on their contibution. The new blockchain will exhibit dramatically faster transactions, higher security and will be a high-preference network for Aritificial Intelligence, Web 3 and AR/VR platforms. BGold will enjoy all the features, utilities & projects deployed on the BFIC blockchain as its own utility.

Tokenomics
